

Dashwood Industries Inc. a major manufacturer and distributor of windows and entrance systems for the residential and commercial markets has an immediate opening for a Manufacturing Engineer.

As the Manufacturing Engineer you will be required to:

Initiate continuous improvement projects

- > Participate in Lean initiatives
- > Create and implement product design improvements
- > Introduce new manufacturing and assembly processes to production
- > Analyze existing production methods and implement quick set ups
- > Develop and implement cost reductions initiatives
- > New equipment specification, procurement, and installation
- > Liaise with suppliers and customers to resolve problems
- > Design fixtures, jigs and tools for use in manufacturing
- > Identify and troubleshoot manufacturing and design problems
- > Perform time studies
- > Analyze Special Product Requests for Production and Purchased part requirements

Essential Skills and Qualifications include:

- Bachelors Degree in Mechanical, Industrial or a related Engineering field
- Strong CAD skills
- Candidate trained in continuous improvement methodologies such as Lean Manufacturing, including but not limited to 5S, Kaizen, Kanban, Set up Reduction, or Six Sigma
- Must have 3 – 5 years manufacturing experience
- Ability to multi-task and work in a team environment
- Excellent analytical and problem solving skills
- Fluent in English with strong written and verbal communication skills

We are offering a competitive compensation package plus an excellent benefit package.

Candidates may submit resumes by one of the following methods:
